Senior IT & Technology Leader | Technology Transformation |  
Program & Portfolio Management | Cybersecurity & Cloud | AI  
Adoption & Emerging Technology | PMP, CISM

Angola, Indiana, United States

## Summary

I'm an IT Leader and Technology Strategist with 20+ years of experience leading technology transformation, cybersecurity, cloud modernization, software delivery, and IT operations across complex enterprise environments. Throughout my career, I've worked at the intersection of technology, cybersecurity, operations, and business strategy—turning organizational objectives into practical solutions and leading cross-functional teams through complex initiatives. My experience includes leading \$75M+ modernization initiatives, managing \$15M+ technology portfolios, and supporting enterprise environments serving 250,000+ users. My background spans the U.S. Department of State, Department of Defense, Defense Logistics Agency, Internal Revenue Service, and defense contracting, with experience in technology strategy, program and portfolio management, cloud, cybersecurity/GRC, risk management, secure software delivery, IT operations, and organizational transformation. I'm also expanding my focus into Artificial Intelligence and emerging technology, building practical knowledge in Generative AI, LLMs, AI application development, APIs, agentic AI, and AI-assisted development. I'm particularly interested in how organizations can apply AI responsibly to improve productivity, automate processes, strengthen cybersecurity, and create measurable business value. I bring a combination of technology leadership, cybersecurity awareness, program management, business perspective, and continuous learning to complex technology challenges.

Core Areas: IT & Technology Strategy | Digital Transformation | Program & Portfolio Management | Cloud Modernization | Cybersecurity & GRC | AI Adoption | Generative AI & LLMs | Enterprise IT Operations | DevSecOps | Technology Governance | Risk Management | Business & Technology Alignment
